# DIGITAL SMART ADVERTISING POSTER

The digital signage advertising display is a modern digital display solution that utilizes high-definition technology to clearly present diverse information, catering to various display needs. Its flexible playback functionality allows users to update content in real-time, while a centralized management system ensures consistency and timeliness of information.

Equipped with features such as advertising marketing, interactive experiences, and smart split-screen capabilities, this display effectively captures customer attention and enhances brand image. It is widely used in commercial complexes, chain stores, public services, education, and healthcare, helping clients achieve greater profitability.

Additionally, the digital signage can be customized in terms of colors and logos, offering various styles to ensure a perfect fit with brand identity. By providing personalized display content, clients can better engage with their target audience, enhancing the user experience. This digital signage advertising display is not just a tool for information dissemination; it is a valuable asset for driving business success.

## SMART SHOP/ RETAIL DIGITAL KIOSK

The smart store series of signage products includes a variety of devices such as self-service kiosks, store signs, side banners, electronic menus, shelf screens, electronic table signs, and double-sided hanging smart screens. These products come with customizable functions and colors, designed to provide users with comprehensive smart services that precisely match the needs of the store.

By enabling real-time advertising and product recommendations, these signage solutions offer surrounding information and convenient services, highlighting the user-friendly nature of the intelligent navigation system in commercial chain stores. Additionally, with data collection and monitoring capabilities, they assist commercial centers in achieving efficient management. These solutions not only enhance the customer experience but also optimize operational efficiency, making them essential tools in the modern retail environment.

# DIGITAL WAYFINDING SIGNAGE

The smart navigation series products include a variety of advanced signage solutions such as indoor and outdoor parking signs, hanging signs, elevator hall index signs, directional signs, and multifunctional advertising navigation integrated machines. These devices feature remote control, split-screen playback, scheduled playback, and loop playback functions, providing diverse services that offer customers intelligent guidance.

Additionally, the products support an integrated service system for advertising and information display, enhancing the efficiency of information delivery within the mall. This approach not only centers on the consumer, providing smart shopping services, but also empowers the mall to create a smart business district and promote consumption upgrades. With these solutions, malls can optimize customer experience, improve operational efficiency, and drive the intelligent development of the commercial environment.

## Multiple Optional Functions

Dynamic wayfnding, online switching, remote inspection, video and picture play.APP webpage opening, food ordering, visitor sign-in, greeting, warnings, warningvoice interaction, page turning separate locations, place, etc.

# SMART LANDSCAPE PRODUCTS

Smart landscape products include sensor-based smart trash bins, digital signage for sorting trash bins, and solar-powered seating with intelligent signage. These products seamlessly combine user-friendly design with advanced technology, injecting new vitality into urban public spaces. The sensor-based trash bins enhance convenience and hygiene in waste disposal by reducing direct contact, thereby maintaining a cleaner urban environment.

The digital signage for sorting bins provides clear and intuitive information, raising public awareness about environmental protection and encouraging active participation in waste sorting. Additionally, the solar-powered seating not only offers a comfortable resting area for pedestrians but also features built-in smart displays that provide real-time information about weather, traffic, and local events.

These innovative solutions not only beautify public spaces but also convey the concept of a better life, reflecting the city's commitment to enhancing residents' quality of life. The widespread adoption of smart landscape products makes urban public spaces more user-friendly and convenient, improving the overall living experience and showcasing the vision and direction of sustainable urban development.
